Seattle PowerAppers Meetup: Integrate AI and SuperPower Your PowerApps!

Location: Delridge Library :: **Date**: Saturday, Sept. 21st :: **Time**: 11:00AM - 2:00PM

Object Detection

AI Builder / CDS Intro → Create a New PowerApps Environment w/CDS → Create a new Custom Entity in CDS → Create a new Object Detection Model → Take photos of PowerAppers → Tag images

admin.powerapps.com

Using Flow

This will hold the name of the objects we want to detect

:) Only those who want to play :)

Train the model → Build the app → Test the Object Detection Capabilities

Form Processing

Create new Form Processing Model → Import sample forms → Validate field detection → Train the model → Build the app → Create the Sharepoint List

Github AI Builder Samples

Wire the Form Processor to a PowerApps form → Test the Form Processing Capabilities
